

Rahman Shaikh

SENIOR SOFTWARE DEVELOPER

PROFILE SUMMARY

- Total 7+ years of Professional experience, presently serving as Senior Software Developer at Dossiefoyer Pvt. Ltd., also played role of WooCommerce Developer and Web Developer, specializing in PHP-based web applications and e-commerce platforms.
- Expertise in designing and developing enterprise-level ERP systems, B2B e-commerce platforms, custom SEO analysis tools, and scalable multi-tenant solutions using modern PHP frameworks (Laravel, Livewire, CodeIgniter), WordPress, WooCommerce, and cloud platforms (AWS, GCP, Azure, DigitalOcean).
- Recently led development of comprehensive B2B e-commerce platform using Laravel 12/Livewire 3 with multi-tenant organization admin workflows.
- Designed comprehensive ERP systems to automate distributor workflows and developed generic SEO analysis tools leveraging advanced libraries.
- Achieved significant performance improvements (40%-70% load time reductions) across 50+ deployed websites while leading cross-functional teams and mentoring junior developers.
- Demonstrated expertise in modern DevOps practices, API integrations (Shipments, Zoom, Payment Gateways), role-based security implementations (RBAC), consistently improving operational efficiency by 30-50% through innovative technical solutions.

TECHNOLOGY AND APPLICATIONS

- **Languages:** PHP, HTML, CSS, JavaScript, jQuery, SQL
- **Frameworks & Platforms:** Laravel, CodeIgniter (MVC Framework), Livewire, WordPress, WooCommerce, Bootstrap, Tailwind CSS etc.
- **Databases:** MySQL, PostgreSQL, Redis.
- **Cloud & DevOps:** AWS (EC2, S3), Google Cloud Compute Engine, Azure, DigitalOcean, Docker, Jenkins, Git, GitHub Actions, Nginx, Apache etc.
- **Tools & Services:** Laravel Herd, LAMP Stack, XAMPP, CPanel, WHM, Direct Admin, HubSpot, Cloudflare, Maatwebsite Excel, Spatie Permissions, Pest Testing etc.
- **AI Tools & Assistants:** GitHub Copilot, Cursor, Gemini CLI, Perplexity etc.

EDUCATION

PROJECT DETAILS	
Project 1: Panchayat Adhikari SaaS - Financial & Administrative Management System (March-2025 to Present)	Roles: Lead Full-Stack Developer Responsibilities: • Leading a full-stack Laravel 12 web application digitizing administrative and financial operations for Gram Panchayats across Maharashtra, with multi-language support (Marathi, English). • Implemented complex financial management modules including budget planning (Andajpatrak), multi-scheme tracking, income/expenditure management, and automated generation of official financial reports (Namuna formats) using mPDF. • Built administrative features such as staff attendance, payroll, information officer management, and demand proposal workflows integrated with role-based access control and multi-user SaaS subscription model. • Designed and optimized a relational database schema with 35+ models and audit trails, implementing advanced querying, caching, and background queue processing for real-time balance calculations and transaction management. • Developed a responsive, accessible frontend using Livewire with Flux UI and Tailwind CSS following mobile-first design principles, ensuring usability and component reusability. • Integrated Razorpay payment gateway for secure SaaS subscription processing and built a notification system including in-app and email alerts, alongside an integrated support ticket management system.
Project 2: Ways Gifting Company - B2B E-commerce Website and Organization Admin Platform (May-2025 to August-2025)	Roles: Lead Full-Stack Developer Responsibilities: • Built a comprehensive Laravel 12 B2B platform featuring multi-tenant organization admin workflows, integrated shipping solutions. • Designed multi-tenant style organization admin portal for managing organizations, users, roles, gifting polls, orders, and shipments with role-based access control (Admin/Org-Admin/Employee). • Implemented robust bulk Excel import pipeline using Maatwebsite Excel with queued jobs, row-level validation, and database-backed logging for large product catalogs.

	• Integrated Delhivery APIs for AWB creation and shipment status tracking via both polling and webhooks. • Built comprehensive polling module with product voting capabilities, real-time progress tracking, audit-friendly snapshots, and detailed analytics exports. • Delivered admin dashboards with advanced date/org filters and KPIs tracking orders, shipments, revenue, and user engagement. • Led end-to-end development using Laravel 12 creating SPA-like user experience, improving admin productivity and reducing manual operations by 30-50%. • Deployment to DigitalOcean droplets with Nginx, health checks, and comprehensive logging, reducing release time from hours to minutes.
Project 3: SEO Analysis Tool (Feb-2024 to Dec-2024)	Roles: Lead Full-Stack Developer Responsibilities: • Developed a comprehensive SEO analysis and web crawling tool using CodeIgniter 4 PHP framework, automating website auditing and reducing manual SEO tasks by 80%. • Engineered a scalable, configurable web crawler supporting analysis of 500+ URLs with multi-resource extraction, including pages, images, CSS, and JavaScript files. • Integrated Google Custom Search API and Google Analytics API for advanced keyword research, meta tag analysis, and search result auditing. • Built a secure user management system with role-based access control, password hashing, and session management for multiple user types. • Designed and implemented data export capabilities generating CSV reports for client presentations and SEO insights. • Utilized web scraping technologies such as Goutte to extract data analyze JavaScript-rendered content. • Developed a responsive, user-friendly dashboard interface using Bootstrap, JavaScript, and modern frontend technologies ensuring cross-device compatibility. • Optimized performance and security with configurable crawling limits, CORS middleware, input validation, and MVC architecture for maintainability.
Project 5: BuySports E-commerce Website (Dec-2021 to Aug-2022)	Role: WooCommerce Developer

	Responsibilities: • Developed comprehensive e-commerce website for Sports Square Pvt. Ltd. using WordPress and WooCommerce to sell sporting goods across multiple categories. • Implemented advanced product catalog with filtering options, size/color variations, and inventory management system. • Configured payment gateway integrations (Razorpay) and shipping calculation modules for nationwide delivery. • Designed responsive mobile-first interface optimizing user experience across all devices. • Implemented Basic SEO optimization strategies and Google Analytics integration.
Project 6: PeCfy Ecommerce Marketplace Platform (May-2021 to Nov-2021)	Roles: Backend Developer Responsibilities: • Built multi-vendor WooCommerce marketplace using Dokan plugin to facilitate online sales for sports community vendors. • Developed vendor registration and verification system with automated commission calculation and payout processing. • Implemented advanced product management interface allowing vendors to manage inventory, pricing, and promotional campaigns. • Created comprehensive admin dashboard for monitoring vendor performance, transaction analytics, and dispute resolution. • Integrated review and rating system with automated email notifications, resulting in 30% increase in vendor satisfaction and 25% growth in platform transaction volume.

Project 7: Global Market Estimates Platform (Jun-2019 to Dec-2019)

Roles: Full-Stack Developer

Responsibilities:

- Designed and implemented both frontend and backend components to manage extensive market data and client reporting.
- Developed a robust admin dashboard for managing reports, user subscriptions, earnings, blogs, and payment gateways.
- Built dynamic content management features for publishing detailed market analysis and business insights.
- Implemented user authentication with tiered subscriptions and integrated secure payment systems.
- Enhanced platform usability through responsive web design and intuitive interfaces to facilitate complex data exploration.
- Integrated advanced analytics for tracking user engagement, popular reports, and subscription trends.
- Collaborated closely with market research and business teams to ensure seamless data updates and feature delivery.
